-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pfauser et al. (2,520,652).

Pfauser et al. ('652) disclose a tool and extension. Pfauser et al. ('652) disclose the tool as claimed except for providing external threads on the distal end of the tool handle and a hollow extension member having first and second ends wherein each respective end has internal threads to, respectively, cooperate with the external threads on the distal end of the tool handle, in order to provide telescopic movement. However, the examiner contends that it would have been obvious to one having ordinary skill in the art at the time the invention was made to reverse the thread arrangement, e.g. providing threads on a proximal end and a distal end of the tool handle, and threads on the open end of the extension member, in order to simplify the manufacture of the tool, as it is known that the provision of external threads on a device is easier than providing internal threads. Furthermore, the mere reversal of the essential working parts of a device involves only routine skill in the art. *In re Gazda*, 219 F.2d 449, 104 USPQ 400 (CCPA 1955).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lin, Chiang, Hillinger, Mandl, and Foss each disclose a tool and extension.
